LED technology and craftsmanship combine in SIM, a new series of wall lights developed specifically for use in the bathroom and hallway.

Clean and refined, a letter box-shaped 500 mm brass base supports a clear and even panel of light that can sit flush with the wall, recessed or extended outwards to suit the space. Like the rest of KAIA's collection, the SIM series is available in a number of new bespoke finishes including a rich and dark patinated brass expertly oxidised by a team of knowledgeable craftsman in a small workshop in England.

S I M
Frame Small

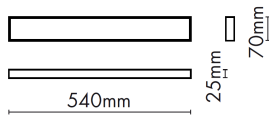

Type	Wall/ Ceiling light
Material	Solid brass
Environment	Indoors
Dimensions	506 x 36 x 25 mm
Weight	1,5 kg
Certification	IP44 CE
