Lever depth : 6 mm

Backplate thickness : 1,5 mm

Backplate diameter : 55 mm

Finishes : several finishes available

Manufacturing : France

Design : bonnemazou cambus designers

DOOR JEWELRY

We have imagined a fine MODULAR door hardware concept available in a collection of interchangeable forms, colours and finishes of quality materials.

Three solid brass pieces are machine-constructed, then adjusted and assembled by hand to perfection.

Five door handle forms are proposed: Pilule bold/Pilule light/Goutte bold/Goutte light/Olive light.

Three pin designs decorate the door handle: Degré/Molette/Bille.

The door handle may be used alone or combined with a decorative plate: collection Oval/Circé/Nuage/Parisettes/Lune

Add to that CLOSET KNOBS, which can be associated with decorative plates.

The handle shown here is one of the combinations that we propose. Many others are to discover on our web site:

www.bonnemazou-cambus.fr

* Our squares bar size are split milled steel to guarantee a perfect hold. To fit on latch of 8mm we can sell adapter (7->8mm)

** the fixing screws of the decorative plate are 2.5x10mm or 2x10mm solid brass screws

*** The return spring, which allows the handle to come back is included in the lock located in your door. Our handles are not heavy but it is nevertheless advisable to use quality spring locks and preferably with a 50mm axis for an aesthetic question. We recommend the brand THIRARD MONOMAX series that exists in several finishes.

**** The proposed squares bar size is 7x 78 mm long adapted to a standard door with a thickness of 40mm. Depending on the thickness of your door we can offer different lengths.
